Resume

- **Full-stack developer with a focus on back-end.** I have built and deployed interfaces and APIs utilizing JWT, async queues, caching, architecture, best practices, and testing.
-

Core Technologies

- **Java / Spring Boot, Node.js / TypeScript, React, Next.js, PostgreSQL, Redis, Docker, AWS, Test.**
-

Education and Languages

- **B.S. in Computer Science – Cruzeiro do Sul University (final semester, graduating in 2026);**
 - Career Essentials in **Software Development by Microsoft**:
 - Career Essentials in **Cybersecurity by Microsoft**:
 - **Advanced English** / Native Portuguese.
-

Projects (Deploy)

- **Reservvo [Java, Spring Boot, Next.js, PostgreSQL, Redis, Docker] — reservvo.cloud**

Online booking platform. REST API with JWT authentication, an asynchronous queue (Redis Streams with retry and DLQ), AWS, cache with coordinated invalidation, and a scheduler for expired reservations. Tested. Deployed on a VPS (Docker Compose + Caddy); front-end on Vercel. - Personal Project

- **Byro [Laravel, React, PostgreSQL, Mercado Pago] — getbyro.store**

E-book store. REST API with Sanctum, checkout via Mercado Pago, signed-URL downloads, and OpenAPI documentation. Tested. Deployed on a VPS (Docker Compose + Caddy); front-end on Vercel. - **Freelance**

- **Baldu Raridades [Next.js, Sanity, Asaas] — balduraridades.com.br**

E-commerce site for caps, clothing, and streetwear. Payment checkout via Asaas, shipping calculation via Melhor Envios, and item management via Sanity CMS. Deployed on Vercel. - **Freelance**
