Objective

- Full-stack developer with a preference for back-end.
-

Core technologies

- **Java + Spring Boot, Node.js + TypeScript, PHP + Laravel**, React, Next.js, PostgreSQL, MySQL, Redis, Docker, AWS, Testing...
-

Education & Languages

- Studying Computer Science at Cruzeiro do Sul Virtual (final semester, graduating in 2026);
 - **Advanced English**;
 - Native Portuguese.
-

Projects

➤ Reservvo [Java, Spring Boot, Next.js, PostgreSQL, Redis, Docker] — reservvo.cloud

Online booking platform. REST API with JWT authentication, an asynchronous queue (Redis Streams with retry and DLQ), cache with coordinated invalidation, and a scheduler for expired reservations. Tested. Deployed on a VPS (Docker Compose + Caddy); front-end on Vercel.

➤ Byro [Laravel, React, PostgreSQL, Mercado Pago] — getbyro.store

E-book store. REST API with Sanctum, checkout via Mercado Pago, signed-URL downloads, and OpenAPI documentation. Tested. Deployed on a VPS (Docker Compose + Caddy); front-end on Vercel.

➤ Trackrr [Express, TypeScript, Next.js, PostgreSQL] — github.com/odgiedev/trackrr

Personal expense tracker with a monthly budget per category. JWT authentication, validation with Zod, and unit + integration test coverage (Vitest, Supertest).
